

# MotionProOTP Android 2.10

## Release Note

Release Date: February 16, 2023

### Introduction

This release document summarizes the device requirements, main features, fixes and limitations for the release of the MotionProOTP Android Client 2.10.

### Device Requirements

- Android 7.0 to 12.0 (software)
- Multi-touch screen
- ARM, ARM V7 and ARM V8 CPU

The MotionProOTP client has been tested on the following devices:

- Galaxy S21 5G (Android 11)

It is expected that the MotionProOTP client can work properly on most Android devices meeting the minimal software requirement.

## IMPROVEMENTS AND FIXES

---

### Fixes

- Solved the issue that MotionProOTP client could not work properly when the virtual site is “shared” after the client security function is enabled. (128499)

## KNOWN LIMITATIONS

---

There are no known limitations in this release.
