Array Networks End of Support (EoS) Announcement for the Secure Virtual Desktop (SVD) Feature

Release Date: August 7, 2015

Overview

Array Networks announces the End of Support (EoS) for the Secure Virtual Desktop (SVD) sub-feature of the Client Security feature on the AG and SPX Series SSL VPN products effective August 7, 2015.

EoS Schedule

Product	End of Software Feature Availability	End of License Availability	End of Sale	End of Technical Support
AG	August 7, 2015 (ArrayOS AG 9.3.0.215)	August 7, 2015 (ArrayOS AG 9.3.0.215)	August 7, 2015	August 7, 2015
SPX	September 30, 2015	September 30, 2015	August 7, 2015	August 7, 2015

Impact

Existing customers can still use the SVD feature if they purchased the SVD feature license previously and are using earlier AG/SPX versions. However, Array Networks will no long fix any issues related to the SVD feature. After upgrading the system to new AG/SPX versions not supporting the SVD feature, these customers can no longer use the SVD feature.
