

Array Networks Security Advisory: Apache Log4j-2 Deny of Service Vulnerability (CVE-2021- 45105)

Advisory Date: December 20, 2021

Overview

Apache Log4j2 versions 2.0-alpha1 through 2.16.0 (excluding 2.12.3) did not protect from uncontrolled recursion from self-referential lookups. This allows an attacker with control over Thread Context Map data to cause a denial of service when a crafted string is interpreted. This issue was fixed in Log4j 2.17.0 and 2.12.3.

Severity: Critical

Impact

Array Networks AVX, APV, AG, ASF, and AMP Series products are not affected by this vulnerability.

Any questions, please contact Array Networks Support via phone or e-mail.
